

6516205513.txt

I am a truck owner and have had Satellite radio for close to a year. And I love it. A great addition has been the traffic and weather reports available any time I need them. Not just at various times like most radio stations. I hope government will not interfere in business yet again and make a mess of progress and make competition unfair by choosing sides in business enterprises. Let me and my fellow Americans decide who offers the services I need. We do not need you doing that.

Thanks

Jack A. Styer
